Village Receives ISO Analysis

Every four years, the Insurance Services Office, Inc. (ISO) evaluates the Village's building codes, fire departments and water systems, and provide advisory insurance underwriting and rating information to insurers. ISO continues to rank the Village of Burr Ridge as a "4" for 1 and 2 family residential property and a "3" for commercial and industrial property. This is the same rating that we received four years ago. Attached please find a letter from Mary Lucidi, Building Code Technical Analyst for ISO, explaining their program.

RE: Building Code Effectiveness Grading Schedule Results
Burr Ridge, DuPage, Cook County, IL

Dear Mr. Pollock:

We wish to thank you for the cooperation given to our representative, Roger DeBruler, during our recent survey. We have completed our analysis of the building codes adopted by your community and the efforts put forth to properly enforce those codes. The resulting Building Code Effectiveness Grading Classification is 4 for 1 and 2 family residential property and 3 for commercial and industrial property.

The Insurance Services Office, Inc. (ISO) is an insurer-supported organization with the primary mission of providing advisory insurance underwriting and rating information to insurers. There is no requirement that insurers use our advisory material. Insurers may have adopted, or may be in the process of adopting, an ISO insurance rating program that will provide rating credits to individual property insurance policies in recognition of community efforts to mitigate property damage due to natural disasters. These insurers may use the Building Code Effectiveness Grading Classification we have recently developed for your community as a basis for the credits used. While individual insurers may use different credits or different effective dates, the ISO program will apply credits to new construction within Burr Ridge that has been issued a Certificate of Occupancy in the year 2016 and forward.

We will email our report which provides additional information about our classification process and how we have graded various aspects of your community's building codes and their enforcement.

We want to highlight the fact that the Building Code Effectiveness Grading Schedule is an insurance underwriting and information tool; it is not intended to analyze all aspects of a comprehensive building code enforcement program nor is it for purposes of determining compliance with any state or local law or for making property/casualty loss prevention and life safety recommendations.

If you have any questions about the Classification that was developed, please let us know. Additionally, if you are planning on any future changes in your building codes or their enforcement, please advise us as these changes may affect our analysis and your community's grading classification.

Sincerely,

Mary Lucidi

Building Code Technical Analyst
